

To whom it may concern,

We are looking to provide new or updated technology for our art, library and music programs. As a school, our student numbers have increased steadily each year to put us close to full capacity in Preschool through the 8th grades. As we grew, we were able to hire teachers for those programs. We strive to create an environment that enables our students to have the best chance of success after they leave our school and go on to graduate high school. Our mission, “Faith based education for lifelong success”, remains strong with the support of our community.

Below you will find a summary of what we would like to purchase in each of the programs.

Art- As we enter our 4th year in the art room, we are looking to bring technology in the room with the addition of a document camera, updated laptop and smart board/tv. This will allow us to use our internet to take virtual tours of museums around the world and utilize resources to gather inspiration and independent research about projects and artists.

Library- The equipment needed to create an online catalog system and checkout program. We are ready to implement a library checkout system that enables us to spend less time manually tracking our books- rather using that time to build a strong program for our students. Getting our library online will initially require many man hours for setup and training and we have a commitment for those donated hours by staff and volunteers.

Music- Our music and drama departments need updated cordless microphones. We would use these for a variety of our own needs including our annual Christmas program and Spring Variety Show, concerts and for other events, including sports tournaments, held by our community. We need powerful microphones that can be heard over a large crowd and the cordless option provides them with more freedom to move without the tripping hazard of a cord.

Here is a link to a short video proposal we have put together. <https://youtu.be/9quEloSDVuY>

Below is an estimate of the products & resources we have researched for this project. Any amount would be used to add or update the equipment needed to utilize technology in all of these areas. We appreciate your consideration,

Sincerely,

Sara Erlenbusch/ Art Teacher & Bart Freese/ Principal
Sacred Heart School

Department	Item	Cost	Total
Art Room	HP Laptop (\$1649), Docucam (\$145.01), Smart Board (497.99)		\$2292.00
Library	HP Laptop (\$1649), Barcode Scanner (\$89), Online Software System (\$1320.00) Yearly Subscription x5 years		\$5728.00
Music/Drama	Cordless Mic- handheld (x2) (\$798), Cordless Mic- Lavalier (x2) (\$918)		\$1716.00
		Project Total	\$9736.00
